

As a longtime broadcaster, I have been in the radio business for 25 years and my family for 30 years prior to that, I am very disappointed in the reaction by the FCC to the irresponsibility of a FEW broadcasters. The implementation of a mandatory recording requirement is a slap in the face to the majority of broadcasters who respect the industry and the privilege to use our public airwaves to broadcast news, weather, sports, community announcements, public service announcements and programming which benefits our communities. This unfair burden of mandatory recording is just another cost to be placed upon people who have no record of wrong. In the past few years, the FCC has already imposed more time-consuming paperwork (and costs) with the EEO regulations....more costs with FCC Regulatory Fees...and now more costs with mandatory recordings. (Our competitors in the print media have no such burdens.) Place these burdens on those who have record of complaints, not the innocent!

Thank you for all you do for us. We do respect the privilege to be a broadcaster in the United States of America.

Sincerely,
Dorea Potter
